Tifoon Scan Report

Open Network Ports Monitoring (v0.6.0-SNAPSHOT)

Summary

Scan started at:	01 April 2017, 17:23:55
Scan ended at:	01 April 2017, 17:24:05
Scan status:	Complete
Changes detected:	*Yes*

Configuration

Application Settings

Setting	Value
Scanner active:	true
Scanner tool name:	nmap
Command executor:	process
Scan rate (in seconds):	3600
Only save on changes:	true
Dynamic baseline mode enabled:	false
Use initial scan as baseline:	false
Baseline filename:	scans/port_scanner_report_20170401_170045.yml

Networks Scanned

My office

IP address	Host name
127.0.0.1	localhost
192.168.84.34	raspberrypi.jonf

Protocol	Port range
TCP	0-1023

WWW servers on the interweb

IP address	Host name
159.20.6.22	www.dr.dk
172.217.18.131	google.dk
98.138.253.109	yahoo.com
108.174.10.10	linkedin.com

Protocol	Port range
TCP	80
TCP	443

Changes

1. Network ids with changes:
    1. **My office**
    2. **WWW servers on the interweb**

2. New hosts with open ports discovered:

Network ID	IP address
WWW servers on the interweb	172.217.18.131

3. Hosts no longer with open ports:

Network ID	IP address
WWW servers on the interweb	216.58.211.131

4. Hosts with open port changes:

Network ID	IP address
My office	127.0.0.1

5. New open ports discovered:

My office

IP: 127.0.0.1

Protocol	Port	Service name	Service description
TCP	88	kerberos	Kerberos
TCP	445	microsoft-ds	Microsoft-DS

Open Ports

My office

Scan completed: Yes

IP: 192.168.84.34

Protocol	Port	Service name	Service description
TCP	22	ssh	The Secure Shell (SSH) Protocol
TCP	25	smtp	Simple Mail Transfer
TCP	53	domain	Domain Name Server
TCP	80	http, www, www-http	World Wide Web HTTP
TCP	81		
TCP	139	netbios-ssn	NETBIOS Session Service
TCP	143	imap	Internet Message Access Protocol
TCP	443	https	http protocol over TLS/SSL
TCP	445	microsoft-ds	Microsoft-DS
TCP	465	urd	URL Rendesvous Directory for SSM
TCP	548	afpovertcp	AFP over TCP
TCP	993	imaps	imap4 protocol over TLS/SSL

IP: 127.0.0.1

Protocol	Port	Service name	Service description
TCP	88	kerberos	Kerberos
TCP	445	microsoft-ds	Microsoft-DS
TCP	631	ipp	IPP (Internet Printing Protocol)

WWW servers on the interweb

Scan completed: Yes

IP: 159.20.6.22

Protocol	Port	Service name	Service description
TCP	80	http, www, www-http	World Wide Web HTTP
TCP	443	https	http protocol over TLS/SSL

IP: 172.217.18.131

Protocol	Port	Service name	Service description
TCP	80	http, www, www-http	World Wide Web HTTP
TCP	443	https	http protocol over TLS/SSL
